

FROM THE EUROPEAN ENERGY COMMUNITY TO THE ENERGY UNION  
A POLICY PROPOSAL FOR THE SHORT AND THE LONG TERM

Extract from:  
Sami Andoura and Jean-Arnod Vinois,  
“From the European Energy Community to the Energy Union.  
A policy proposal for the short and the long term”,  
Studies & Reports No. 107, Jacques Delors Institute, January 2015

## TABLE OF CONTENTS

<b>FOREWORD</b> by Jacques Delors	<b>5</b>
<b>EXECUTIVE SUMMARY</b>	
30 FINDINGS, 10 IMMEDIATE ACTIONS AND 10 LONG-TERM BUILDING BLOCKS	<b>13</b>
<b>INTRODUCTION – ENERGY AT THE HEART OF EUROPEAN INTEGRATION</b>	<b>21</b>
<b>1. From 2007 to 2014: great ambitions, adverse developments and a growing EU energy framework</b>	<b>23</b>
1.1. In 2007: great ambitions for 2020 and a new energy policy for Europe	<b>23</b>
1.2. From 2007 to 2014: adverse global and European developments	<b>31</b>
1.3. Updating the energy framework: the 2030 EU energy and climate package	<b>44</b>
<b>2. Critical assessment of European energy policy's strengths and weaknesses: 30 findings</b>	<b>46</b>
2.1. The good but insufficient performance of the EU internal energy market	<b>46</b>
2.2. The implementation of the 20/20/20 objectives: on track but at what cost?	<b>72</b>
2.3. The external dimension of EU energy policy emerged from the crises	<b>88</b>
2.4. In conclusion – The need for action	<b>100</b>
<b>3. The needed technical approach: ten immediate actions for the European energy policy and its stakeholders</b>	<b>102</b>
3.1. To achieve the European internal energy market	<b>104</b>
3.2. To reap the benefits of the external dimension of European internal energy market	<b>112</b>
3.3. To enhance the governance of the European energy policy	<b>116</b>

FROM THE EUROPEAN ENERGY COMMUNITY TO THE ENERGY UNION  
A POLICY PROPOSAL FOR THE SHORT AND THE LONG TERM

<b>4. Boosting the European project: the Energy Union</b>	<b>121</b>
4.1. Adapting the European energy transition to a challenging global context	123
4.1.1. The global context and the decreasing role and status of the EU	123
4.1.2. The new challenges emerging from the energy transition	126
4.2. An Energy Union for all	127
4.2.1. Sustainable economic development: the Energy Union's transition	128
4.2.2. Solidarity: an inclusive Energy Union	139
4.2.3. Europe in the world: a resilient and strategic Energy Union	144
<b>CONCLUSION – A DECISIVE BREAKTHROUGH</b>	<b>155</b>
<b>ON THE SAME THEMES...</b>	<b>157</b>
<b>AUTHORS</b>	<b>159</b>

The authors are very grateful to Jacques Delors and Pascal Lamy for sharing with them their vision, ideas and proposals.

The authors would like to thank in particular their friends, colleagues and stakeholders from EU institutions, national governments, operators, industrial players and representatives from the civil society who have discussed, commented or challenged with them their main findings and proposals.

They also express their thanks to Stefan Bössner who assisted them in their research and analysis all along this 18 month's process.

This report is not exhaustive, and builds on the authors' personal and independent vision, knowledge and experience.
