Jacques Pelkmans and Giacomo Luchetta,
"Enjoying a Single Market for Network Industries",
Studies and Reports No 95,
Notre Europe – Jacques Delors Institute, February 2013.

TABLE OF CONTENTS

FOREWORD	5
EXECUTIVE SUMMARY	8
INTRODUCTION	11
1. Towards a Single Market in Network Industries	13
1.1. A properly functioning single market is ambitious and complex	13
1.2. What is needed to arrive at a single market for network industries?	17
1.3. A single EU market for seven network industries?	20
2. Sectoral Success? – Telecoms and Air Transport	23
2.1. The competitive single aviation market	23
2.2. Potential and actual shortcomings of the air transport market	27
2.3. Competitive national eCommunications markets	31
2.4. Economic gains in national eComms markets	32
2.5. Are the gains in eComms due to liberalisation?	40
2.6. Losers and shortcomings in eCommunications	40

3. The Great Transformation: Electricity and Rail Services	44
3.1. Why electricity is intrinsically difficult to transform	44
3.2. Electricity: price, quality and environmental performance	48
3.3. Freight rail liberalisation: hard, rewarding and truly European	56
3.4. European rail, much ado about freight, little about passengers	59
3.5. Losers in electricity and rail, and possible compensation?	65
